
EDUCATION

B.S.C Computer science

2021 - Present Ruppin
Academic Center

Second year out of three

Specializing in Big Data & Machine Learning

Additional Bioinformatics course

During my academic studies I experiment with the following
programming languages:

C, C#, PHYTON, JAVA, JAVASCRIPT, SQL Also, I
have learned:

OOP, Data Structure, Algorithms, Big Data, Computers
Architecture, Statistics, *Advance Java Programing*,
Statistical learning

During the programming courses, we learned how to develop
well and some design patterns. In the OS course, I learned
how to connect clients to servers using PIPES and FIFO. Basic
knowledge in azure.

I am looking for a program developer position where I
can learn and express my skills, highly motivated passion for
technology and innovation.

Before Studies

Idf: Technician team leader in charge of building work plans,
managing spare parts and quality assurance.

This role taught me important skills such as:

Teamwork, punctuality and leadership.

WORK EXPERIENCE

QA & Deploy Bright Data

2021

Manual and automation web/mobile testing.
Working with platforms such as Linux, bash and
selenium. Commit and revert versions.
